ENGLISH VERSION

1 Installation

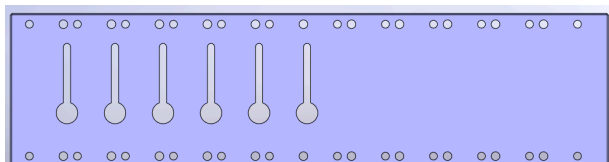

- After installing the RJNET system replace the manual shutter with the motorized version according to the drive bracket alignment instructions of the dimmer mechanical control and also by the direction showed on the label "Front".

- Maintain in place the shutter by tightening the 4 knobs located where the zoom mobile lenses are.

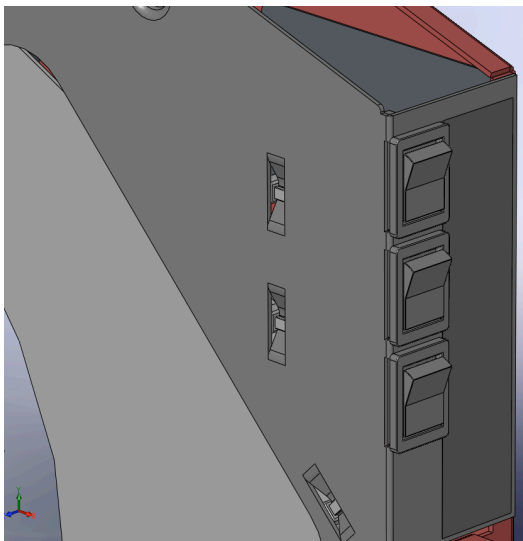

- Replace the top plate with the one found in the "RJNET" kit.

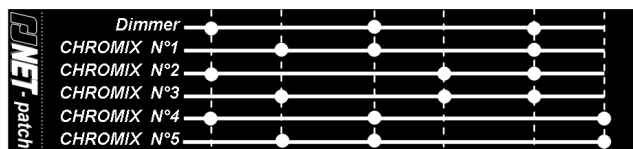

2 Patch

- Make sure that the switches of the PATCH* are set to Dimmer.

The Switch Press position is represented by a point:

* PATCH : Allow to identify a module (Shutter or Chromix) among the RJNET system and not from the DMX network.

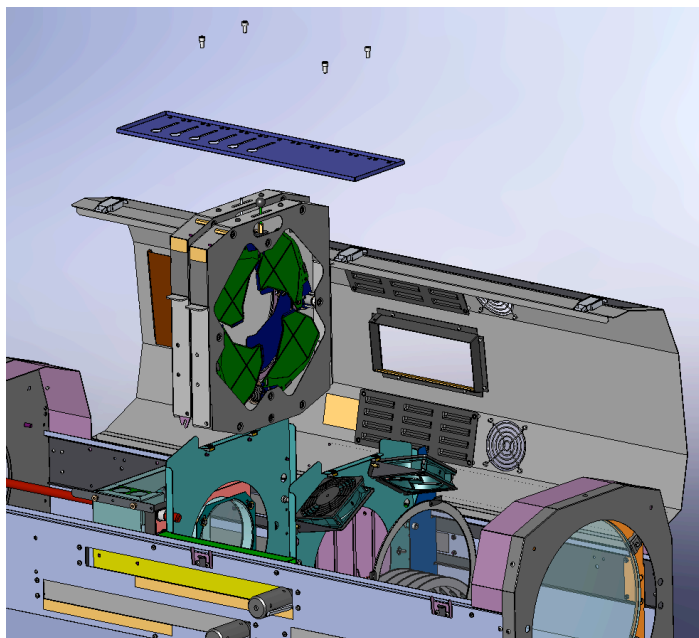

3 DMX Mapping

Accessories	DMX Channel	Parameter	Range
SHUTTER	4	Hi Byte Dimmer	0 - 65535
	5	Lo Byte Dimmer	
	6	Dimmer Master	0 - 255
CHROMIX "1"	7	Gel Color Mixer	0 - 255
CHROMIX "2"	8	Gel Color Mixer	0 - 255
CHROMIX "3"	9	Gel Color Mixer	0 - 255
CHROMIX "4"	10	Gel Color Mixer	0 - 255
CHROMIX "5"	11	Gel Color Mixer	0 - 255

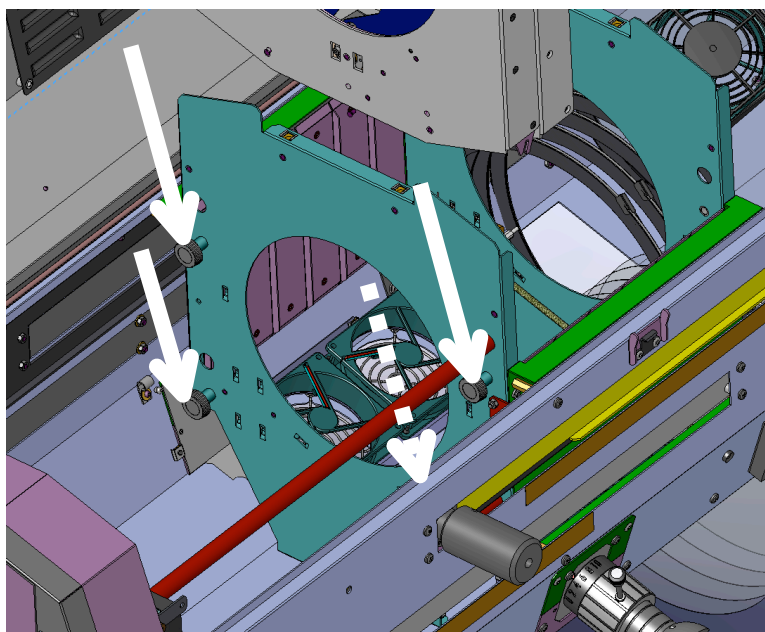

VERSION FRANCAISE

4 Installation

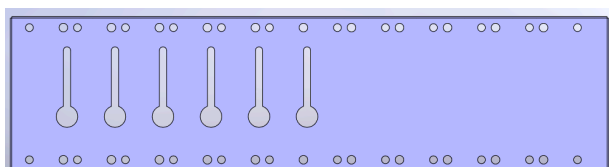

- Après avoir équipé la poursuite de son RJNET, remplacer l'obturateur manuel par le motorisé en respectant les informations d'alignement de l'équerre de commande sur la poignée de reprise manuelle ainsi que l'orientation donnée par l'étiquette "FRONT".

- Plaquer l'obturateur en resserrant les 4 molettes situées dans la partie où se situent les lentilles mobiles du zoom.

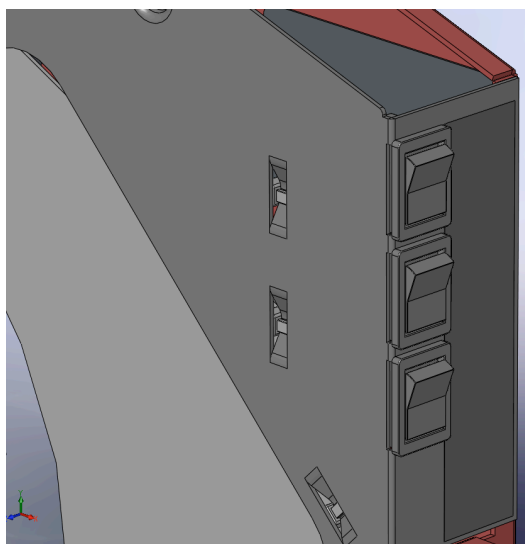

- Remplacer la plaque supérieure par celle fournie dans le kit "RJNET".

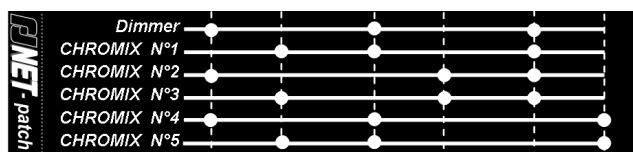

5 Affectation des modules

- Assurez-vous que les interrupteurs de PATCH* correspondent à DIMMER.

La position appuyée de l'interrupteur est repérée par les points :

* PATCH : Permet d'identifier le module (OBTURATEUR et CHROMIX) au sein du RJNET et non du réseau DMX.

6 Charte DMX

Accessories	DMX Channel	Parameter	Range
SHUTTER	4	Hi Byte Dimmer	0 - 65535
	5	Lo Byte Dimmer
