GENERAL INSTRUCTIONS

1. Not for residential use.
2. These fixtures must only be serviced by a qualified technician.
3. In addition to the instructions indicated on this page, relevant health and safety requirements of the appropriate EU Directives must be adhered to at all times.
4. This fixture is in compliance with section 17 - Lighting appliance for theatre stages, television, cinema and photograph studios.
Standards NF EN 60598-1, NF EN 60598-2-17, Low Voltage Directive 2014/35/UE & EMC Directive 2014/30/UE.
5. This fixture is rated as IP20, and is for indoor use only.

FIXTURE

6. Ensure fixture is correctly mounted on an appropriate support.
7. Protection screens and lenses must be replaced in the event of any damage, such as cracks or deep scratches, since these might reduce performance.
8. When hung or flown the fixture must be secured by an additional hanging accessory (such as a safety cable or bond) of suitable length.
9. Safety bonds or cables must be securely attached to the back of the fixture and be as short as possible, or rolled up as necessary, to minimise travel distance should the fixture be dislodged.
10. Movable accessories (scroller, etc.) must also be secured with a suitable safety cable or bond at the front of the fixture.
11. The combined weight of both the fixture and the accessories must be considered when choosing the load-bearing capability of safety cable or bond.
12. Do not open lighting fixture when the source is on.
13. WARNING: LED source becomes hot during use. Allow fixture to cool before servicing.
14. Do not tamper with design of fixture nor any of its safety features.
15. Tighten electrical mains cable connections regularly and replace with one of identical specification if damaged.
16. Use only with correct power supply.

VENTILATION

17. Keep well away from flammable material.
18. Not for outdoor use. Do not cover. Do not permit fixture to get wet.
19. To avoid overheating, do not obstruct air vents.
20. Ensure any cooling fans are in correct working order. If fans are not working, turn fixture off immediately and service as necessary.

CLEANING

21. Do not touch the LED source with your fingers.
22. To clean the optical parts, use a soft cloth in combination with distilled water or isopropyl alcohol recommended for coated optics. Do not use any cleaning product that contains solvents or abrasives, as these can cause surface damage. Dry with a soft lint-free cloth.
23. Regularly remove dust with a soft lint-free cloth.
24. If the fixture has filters, they must be cleaned frequently.

POWER SUPPLY

25. Disconnect from the mains before servicing.
26. Mains connection only. Do not connect to "electronic output" such as dimmer.
27. Ensure power supply circuit breakers, always remain accessible.

PLEASE NOTE

This product has been built to conform to European standards relating to professional lighting equipment. Any modification made to our products will void the manufacturers' warranty.

2.3 Accessories included

	Reference	Description
1	PF500M2	180 x 180 mm (7.1 x 7.1 in) metal filter holder
2	SGUX	Universal A-size gobo holder (metal, glass, frosted glass)
3	D8	Shutters (x4)
4	DN41242300	Quick Start manual
5	CAL03	3 meter power cable (3G1,5 HO7RNF) with Neutrik PowerCon® True1 TOP and CEE 7/7 (2P+T NF/SCHUKO) connectors (standard version)
6	CAL04	1,50m power cable UL/CSA with Neutrik PowerCon® True1 TOP connector (North American version)
7	FO100-10	Optical filter

	Reference	Description
1	CAV 600A	Double slot front cassette for 180 x 180 mm accessories
	CAV 600AE	Double slot front cassette for 185 x 185 mm accessories
2	PCP1716A	16A blue 2P+E 6h IEC60309 power connector
3	PF600M2	185 x 185 mm (7.28 x 7.28 in) metal filter holder
4	G500	180 x 180 mm safety grid
5	IWSX755	Drop-in iris (monoplane) with holder
6	VD 120	120x120mm frosted glass
	FO120C-1	120x120mm 1° frost optical filter
	FO120C-10	120x120mm 10° frost optical filter
	FO120C-2	120x120mm 2° frost optical filter
	FO120C-5	120x120mm 5° frost optical filter
7	D8	Shutter
8	876	Hook clamp 40 x 10 mm with 28 mm M10 screw for Ø35 to Ø50 mm pipes
9	880	Hook clamp 40 x 10 mm with 28 mm M10 screw for Ø50 to Ø63 mm pipes
10	CS2	Safety cable Ø3 mm (length = 600 mm)
11	RPF613	180 x 180 mm front extension cassette for 215 x 215 mm accessories without fan (recommended for dark colours on 613SX/663SX)
	RPF613E	180 x 180 mm front extension cassette for 245 x 245 mm accessories without fan (recommended for dark colours on 613SX/663SX)
12	TH600	180 x 180 mm "Top hat" (without safety cable)
13	DMXcat	Bluetooth DMX/RDM Multifunction test tool - City Theatrical DMXcat®

3 Set-up

3.1 Mechanics

3.1.1 Operating positions

3.1.2 Minimum distance between a flammable material and the lighting unit

3.1.3 Instructions for use

IP20 - Indoor use only

3.1.4 Hanging

- Ensure fixture is correctly mounted on an appropriate support

Net weight:

673SX / CSX = 19.2 kg (42.2 lbs)

674SX / CSX = 20.8 kg (45.8 lbs)

671SX / CSX = 21 kg (46.2 lbs)

3.1.5 Safety cable

- When hung or flown the fixture must be secured by an additional hanging accessory (such as a safety bond or cable) of suitable length.
- The combined weight of both the fixture and the accessories must be considered when choosing the load-bearing capability of safety cable or bond.
- Safety cables or bonds must be securely attached to the back of the fixture and be as short as possible, or rolled up as necessary, to minimise travel distance should the fixture be dislodged.

3.2 Electrical information

3.2.1 LED source

Never touch or scratch the LED surface.
See 6.1.4 LED cleaning procedure if cleaning is necessary.

3.2.2 Power supply

Power supply				
Voltage	Frequency	Input power (VW)	Input power (CW)	Connectors
VW: 90 → 277 V CW: 190 → 277 V	47-63 Hz	2.72 A / 591 W @ 230 V 5.60 A / 606 W @ 110 V 6.19 A / 610 W @ 100 V Max: 7 A Standby mode: 9.2 W	3.22 A / 705 W @ 230 V 3.04 A / 704 W @ 245 V 3.53 A / 704 W @ 208 V Max: 3.83 A Standby mode: 8.2 W	Neutrik powerCON TRUE1 TOP Input : ref. NAC3FPX-TOP
 • Class 1 product. This luminaire must be earthed. • Must be connected directly to AC power. Do not connect to dimmer power. • Automatic mains voltage detection.				
Daisy chain <u>(with delivered power cable):</u>  Maximum (VW): 5 units @ 230 V 2 units @ 120 V				

Power cable						
 						
Power cable		Connector	Mains plug	Cable type	Cable length	Wiring

3.3 DATA

3.3.1 DMX 512-A / RDM

Protocol	Input connector	Output connector
USITT DMX 512-A RDM	XLR 5-pin	XLR 5-pin

DATA connectors				
PIN #	DMX	Description		
1	Shielding	Foil & Braided Shield		
2	DMX (-)	1st conductor of 1st twisted pair		
3	DMX (+)	2nd conductor of 1st twisted pair		
4	Not used	1st conductor of 2nd twisted pair		
5	Not used	2nd conductor of 2nd twisted pair		

Daisy chain:

3.3.3 Ethernet / DMX node / DUAL

RJ-LED2 FIRMWARE PLATFORM (Node Mode) full manual is available for download at www.robertjuliat.com/LED/PDF_PAGE

3.4 Accessories

3.4.1 Front filter holder

The filter holder includes perforations designed for stapling to keep the gel in position.

For filter dimensions, see section 4.7

3.4.2 Internal filter holder

For filter dimensions, see section 4.7

3.4.3 Gobo holder / Iris

For gobo dimensions,
see section 4.10

3.4.4 Optical filter

For filter dimension,
see section 4.10

3.4.5 Shutters

Step 1

Step 2

Step 3

4.1 Light intensity

4.1.1 Range

4.1.2 Control

4.1.3 Parameters

4.1.3.1 Dimming resolution - DMX only

→ Set through RDM protocol, web interface or local control

Resolution	DMX mode (VW)	DMX mode (CW)
8 bits – 255 steps	1 - 3	1
16 bits – 65 535 steps	2 - 4	2

4.1.3.2 Dimming curve

→ Set through RDM protocol, web interface or local control

4.1.3.3 Set maximum position

→ Set through RDM protocol, web interface or local control

4.1.3.4 Dimming mode

→ Set through RDM protocol, web interface or local control

Mode	Result
Without PWM	Flicker-Free, perfect for filming
PWM 17 kHz	Good dimming quality (Default Value)
PWM 3,2 kHz	Very good dimming

4.2 Strobe

4.2.1 Range

4.2.2 Control

→ Remotely with DMX512-A / Art-Net / sACN / Dual protocols.
Mode 2 – 4 (VW) / Mode 2 (CW)

4.3 CCT adjustment (only for Variable White version)

4.3.1 Range

4.3.2 Control

→ Remotely with DMX512-A / Art-Net / sACN / Dual protocols + Mode 3 – 4

→ Locally via Standalone mode
See 5.3 Home Values

Focus mode: when standby screen displayed,
Push Exit or the upper arrow button for 3 secs → Light output = 100% for 1 minute
2x times Exit or the upper arrow button → Light output = 0%

4.3.3 Parameters

Mode	Range	Consistency
Calibrated (default)	3000K → 6300K	Same colour on every fixture
Extended	2700 ± 50K → 7000 ± 300K	Slight colour difference can be seen

4.4 Response time

4.4.1 Range

4.4.2 Control

DMX512-A

DMX Console

Remotely, with
DMX512-A / Art-Net / sACN / Dual protocols
Mode 2 – 4 only (VW) / Mode 2 only (CW)

RDM compatible device

RDM

or

Web interface

→ Set through RDM protocol or web interface

Mode 1 – 3 (VW) Mode 1 (CW)

Mode	Speed

→ Selection in menu: **SETUP / DISPLAY**

Display	Function	Description
	Brightness	Adjust the intensity of the screen To change value, press buttons:  
	Auto-OFF	To keep the main display (home screen) always ON, select : Always ON Timer without warning Timer with warning   Main display turns OFF after 20 seconds

5.2 DMX512 - A remote control

5.2.1 Protocol

E1.11 – 2008, USITT DMX512-A

5.2.2 Configuration

Set mode through web interface
(see 5.4.4 Web interface)

Set mode through RDM
protocol

Local control

- 1 - Set DMX address
- 2 - Set personality mode (see 5.2.4. DMX chart)

Caution:

Activate DMX in protocol mode beforehand.

DMX address of the unit from 1 to 512

Selection of the unit personality

5.2.3 Parameters

5.2.3.1 DMX Hold

→ Selection in **SETUP / Data Setup / DMX HOLD** menu

5.2.3.2 Fixture ID

→ Selection in **SETUP / DATA SETUP / FIXTURE ID** menu

Fixture ID can be set through **web interface** or **RDM protocol** or **local control**

Each unit can be identified by a Fixture ID number

– Once defined, the Fixture ID is displayed on the Home screen.

Example: Installation with 6 units						
Home screen information	ID1 @ 101	ID2 @ 123	ID3 @ 145	ID4 @ 167	ID5 @ 189	ID6 @ 211
Fixture ID	1	2	3	4	5	6
DMX address	101	123	145	167	189	211

5.2.3.3 Terminator

Mode: Auto

A resistor of 120R is automatically connected to terminate the DMX line as the RS485 standard specifies.

5.2.3.4 Node

On sACN/ArtNet/Dual mode we have the possibility to transmit a DMX/RDM signal protocol on the DMX port (Output). The selection can be done through the menu/Webpage/RDM.

On Dual mode (sACN/ArtRdm) the node feature is automatically selected.

5.2.4.1 Variable White version (VW)

DMX Channel	Mode 1: Dimmer 8B	Mode 2: Dimmer 16B	Mode 3: Profile 8B CCT	Mode 4: Profile 16b CCT
1	Dimmer	Dimmer	Dimmer	Dimmer
2		Dimmer fine	CCT	Dimmer fine
3		Strobe duration		Strobe duration
4		Strobe speed		Strobe speed
5		Response time		Response time
6		Control mode		Control mode
7				CCT
8				CCT fine

5.2.4.2 Cool White version (CW)

DMX Channel	Mode 1: Dimmer 8B	Mode 2: Dimmer 16B
1	Dimmer	Dimmer
2		Dimmer fine
3		Strobe duration
4		Strobe speed
5		Response time

5.3 Home values & Standalone

“Home values” represent a selection of parameters manually entered into the device via the keypad to produce a defined lighting effect and dimming behavior.
These Home values can be set in the following modes:

Variable White version (VW)

Functions *	Mode 1: Dimmer 8B	Mode 2: Dimmer 16B	Mode 3: Dimmer 8B CCT	Mode 4: Dimmer 16B CCT	Standalone **
Dimmer	Valeur DMX	Valeur DMX	Valeur DMX	Valeur DMX	HOME VALUE
Response Time	HOME VALUE	Valeur DMX	HOME VALUE	Valeur DMX	HOME VALUE
Tunable white: CCT	HOME VALUE	HOME VALUE	Valeur DMX	Valeur DMX	HOME VALUE

Cool White version (CW)

Functions *	Mode 1: Dimmer 8B	Mode 2: Dimmer 16B	Standalone **
Dimmer	Valeur DMX	Valeur DMX	HOME VALUE
Response Time	HOME VALUE	Valeur DMX	HOME VALUE

If the function is not controlled by DMX, the Home value is automatically activated.

(*) Functions are displayed according to the selected mode (Mode 1-2-3-4 for VW / Mode 1-2 for CW).

- In the case of using one or more functions in Mode 1 / 2 / 3 / 4
Data mode → personality → Mode 1 / Mode 2 / Mode 3 / Mode 4

() Defines a standalone operating mode in the following cases:**

- As default values when used without data Data mode → Protocol → Standalone
- As reference values following a data signal loss. Set up → Data set up → DMX hold → Standalone

5.4 Network

Our network stack can handle several flows of protocol at the same time.

Protocol always available:

- Web page to set up parameters - *See section 5.4.4*
- LLRP (Low Level Recovery Protocol) for IP network configuration - *See section 5.4.5*

A selection of Protocols dedicated to lighting:

- Art-Net V4 - *See section 5.4.1*
- sACN - *See section 5.4.2*
- Dual: Sacn + Art-RDM (DMX512 data signal + RDM) - *See section 5.4.3*

From July 2024 the Robert Juliat equipment based on RJ LED2 platform is configured as follows:

- DHCP (**D**ynamic **H**ost **C**onfiguration **P**rotocol - **RFC1531**) ON
→ <https://www.rfc-editor.org/rfc/rfc1531>
- Zeroconf (**Z**ero-configuration **n**etworking – **IPv4LL/APIPA – RFC3927**) ON
→ <https://www.rfc-editor.org/rfc/rfc3927>

IP Addressing of Parameters - *See section 5.1.2*

Default:

- At startup, the device's IP address is set to 000.000.000.000 with a subnet mask of 000.000.000.000
- After connecting to the network, the device awaits the assignment of an IP address and subnet mask by the DHCP server.
- If there is no DHCP server, a unique IP address and subnet mask are automatically assigned.
IP : 169.254.XXX.XXX Mask : 255.255.0.0

Most personal computers are configured with DHCP and Zeroconf enabled, so the IP address defaults to 169.254.X.X with a subnet mask of 255.255.0.0.

When connected to a Robert Juliat device, since the IP address/mask range are in the same class, network communication works seamlessly.

This configuration was chosen to make it easier for non-IT technicians.

Static IP:

It's possible to configure a static IP address, but be sure to select a unique IP address with the correct subnet mask.

Configuration can be done via the Web Page, RDM, LLRP, Art-Net, or locally.

Default IP Address:

When DHCP mode is OFF and no static IP address has been selected, the device will default to a Class A IP address of 2.XXX.XXX.XXX with a subnet mask of 255.0.0.0.

This address can be found on a label near the ID plate or by pressing the right arrow on the local control.

Default Settings:

DHCP = OFF

Address = 2.XXX.XXX.XXX

Mask = 255.0.0.0

Changing the Controlling Computer's IP Address:

- The IP address and subnet mask of both the fixture and the computer must be on the same network class.
- The computer's IP address must be different.
- Refer to your operating system's support to modify IPv4 settings:

Change your IP address on Windows

➔ <https://support.microsoft.com/en-us/windows/change-tcp-ip-settings-bd0a07af-15f5-cd6a-363f-ca2b6f391ace>

Change your IP address on Mac

➔ <https://support.apple.com/en-ae/guide/mac-help/mh14129/mac>

Example: Using the fixture's default IP address

1 - Computer IP address: 2.2.2.2

2 - Computer subnet mask: 255.0.0.0

5.4.1.1 Protocol

Artistic Licence Art-Net v4.

For more information about Art-Net protocol: <http://art-net.org.uk/>

5.4.1.2 Configuration

Set mode through Web interface
(see 5.4.4 Web interface)

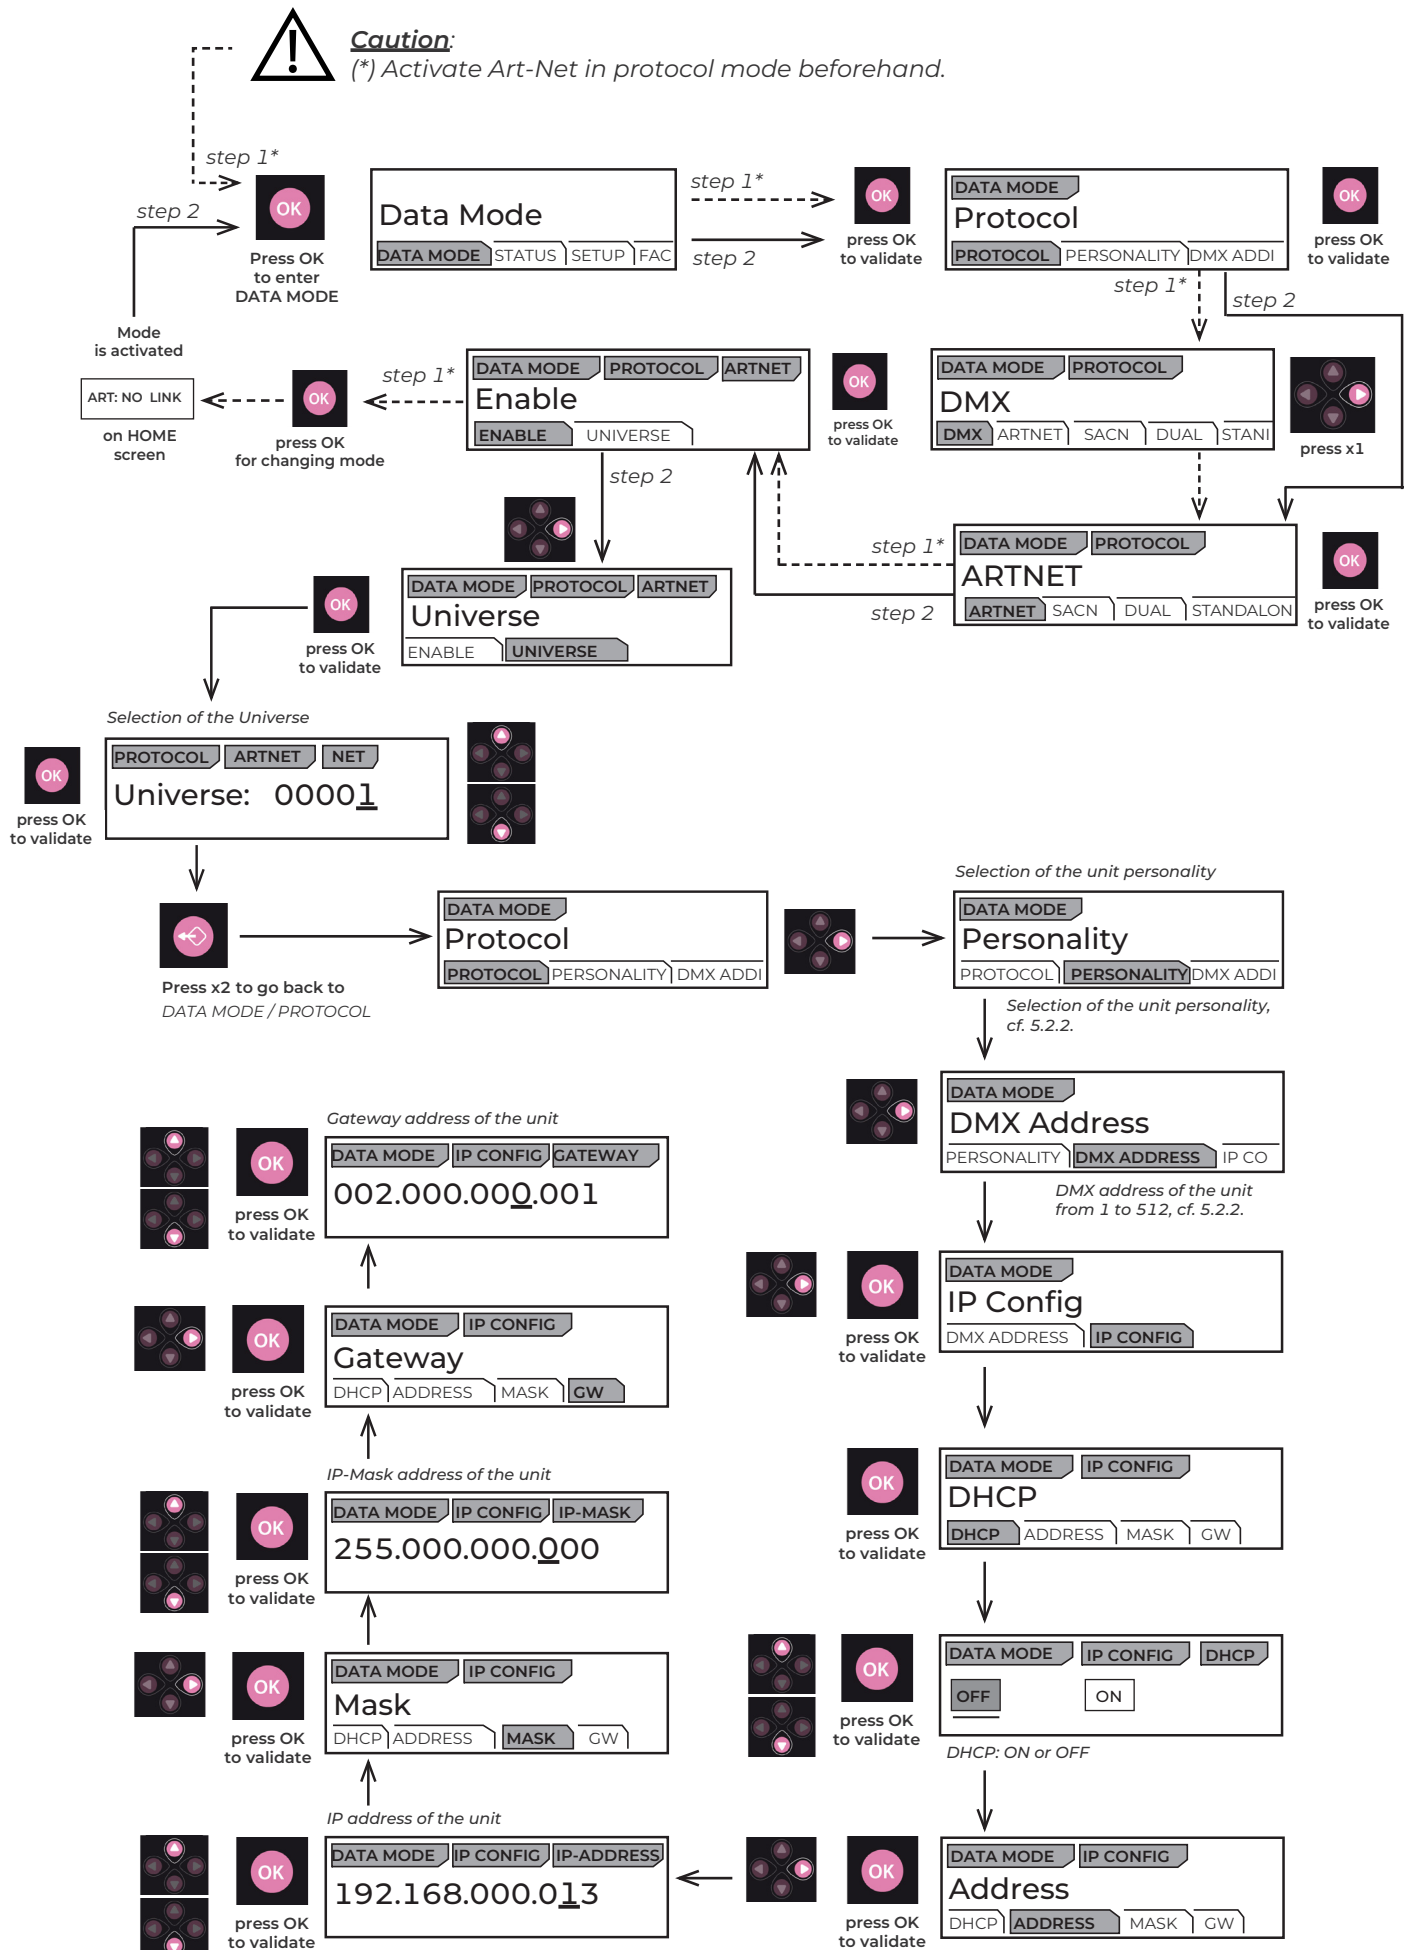

Set mode through RDM
protocol

Local control

- 1 - If necessary, change IP settings
- 2 - Set Art-Net Universe
- 3 - Set DMX address
- 2 - Set personality mode (see 5.2.4. DMX chart)

5.4.2.1 Protocol

ANSI E1.31 – 2009 sACN (Streaming-ACN)

5.4.2.2 Configuration

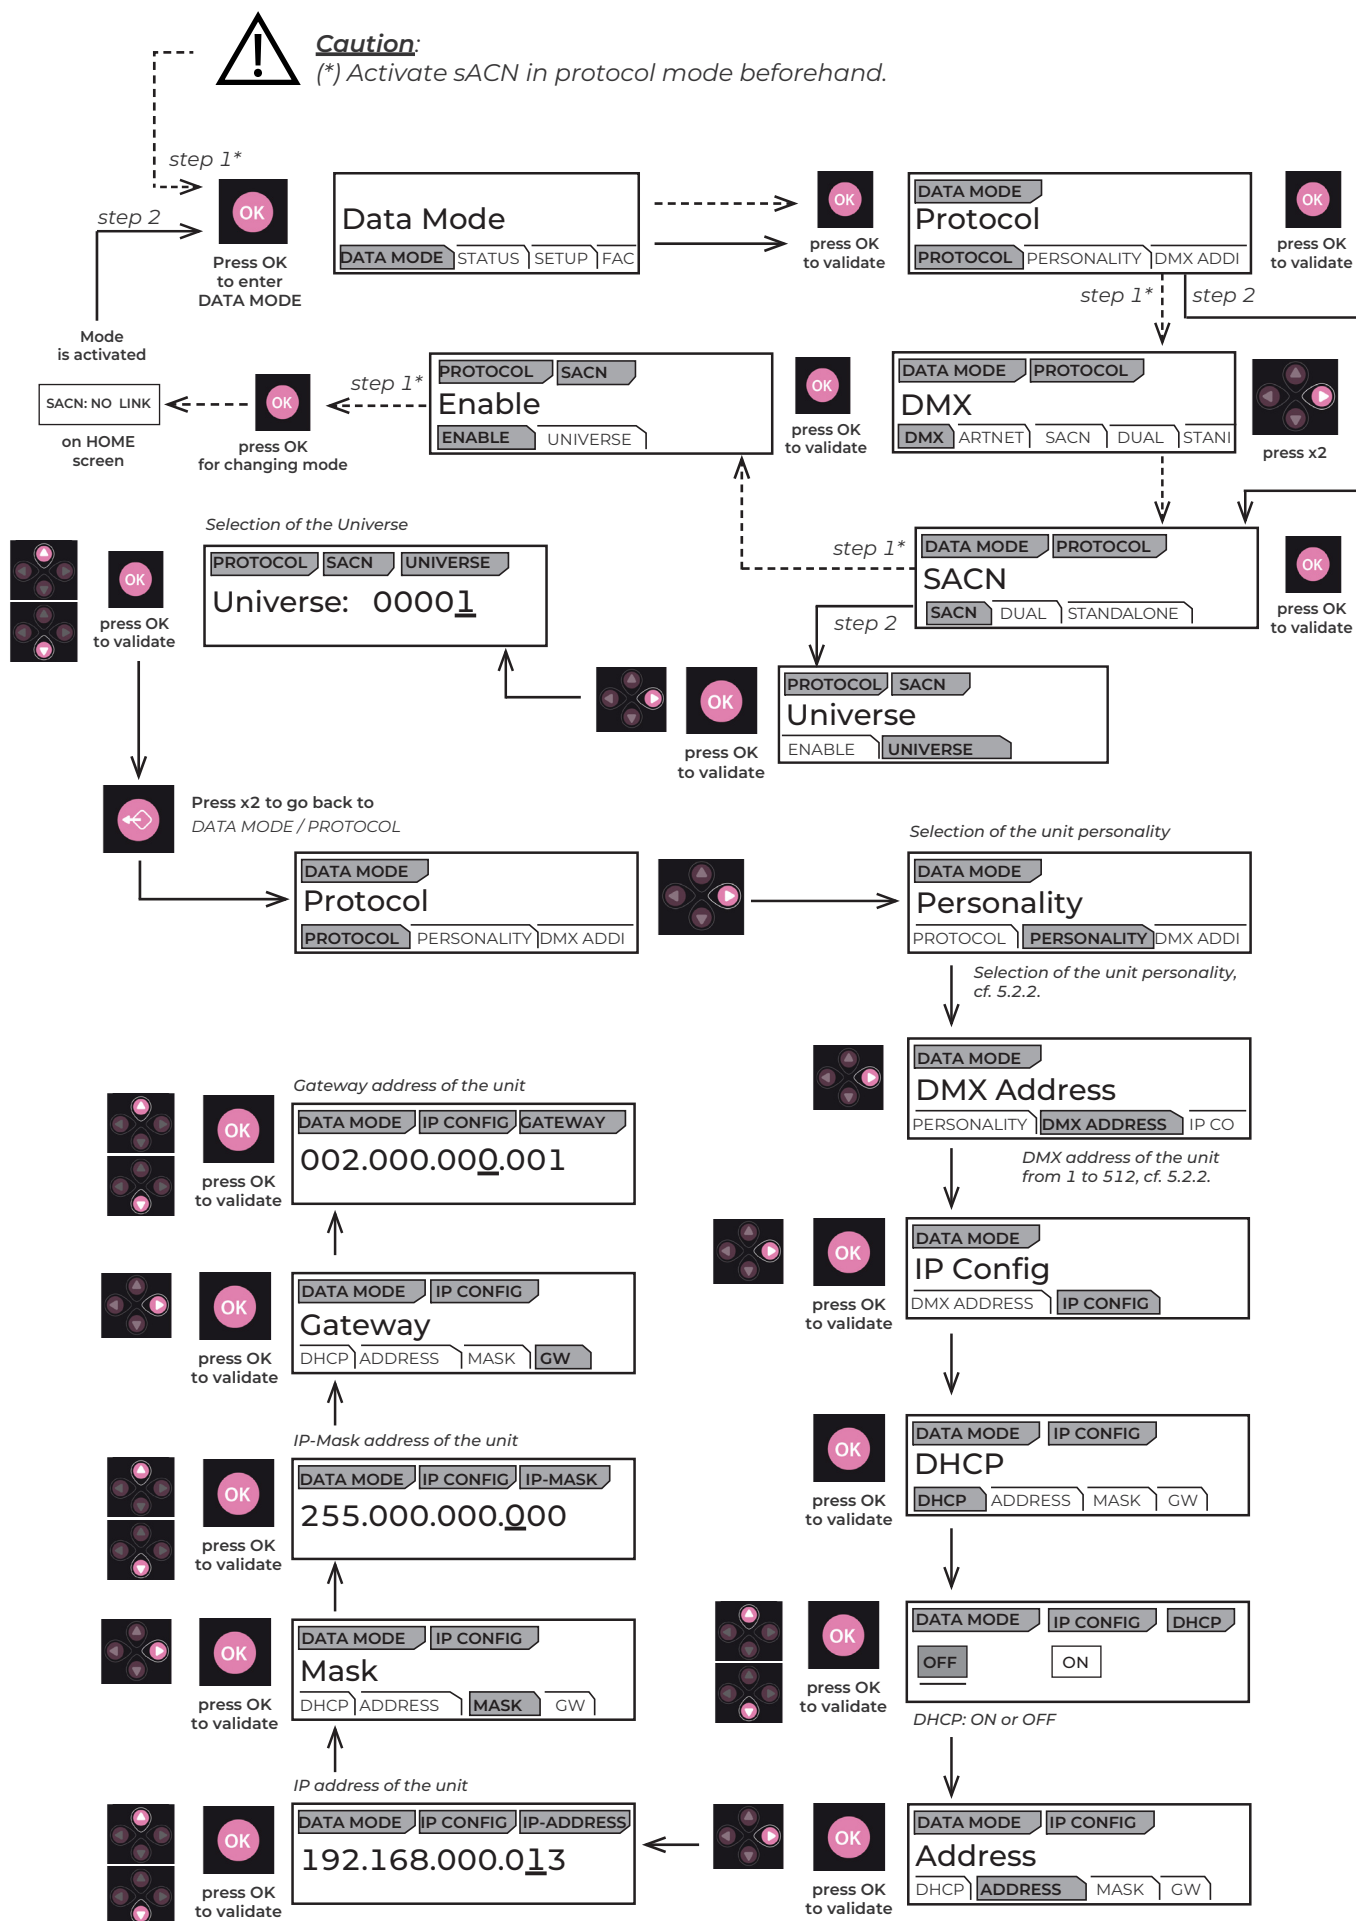

Set mode through Web interface
(see 5.4.4 Web interface)

Set through local control

- 1 - If necessary, change IP settings
- 2 - Set sACN universe
- 3 - Set DMX address
- 2 - Set personality mode (see 5.2.4. DMX chart)

5.4.3.1 Protocol

Dual Mode: Available only on an Ethernet network

It allows to send a DMX 512 signal through a sACN data stream and at the same time to use an Artnet/ArtRdm data stream to control, set and monitor the equipment via RDM.

This mode can be set by Web interface or the local control screen.

5.4.3.2 Configuration

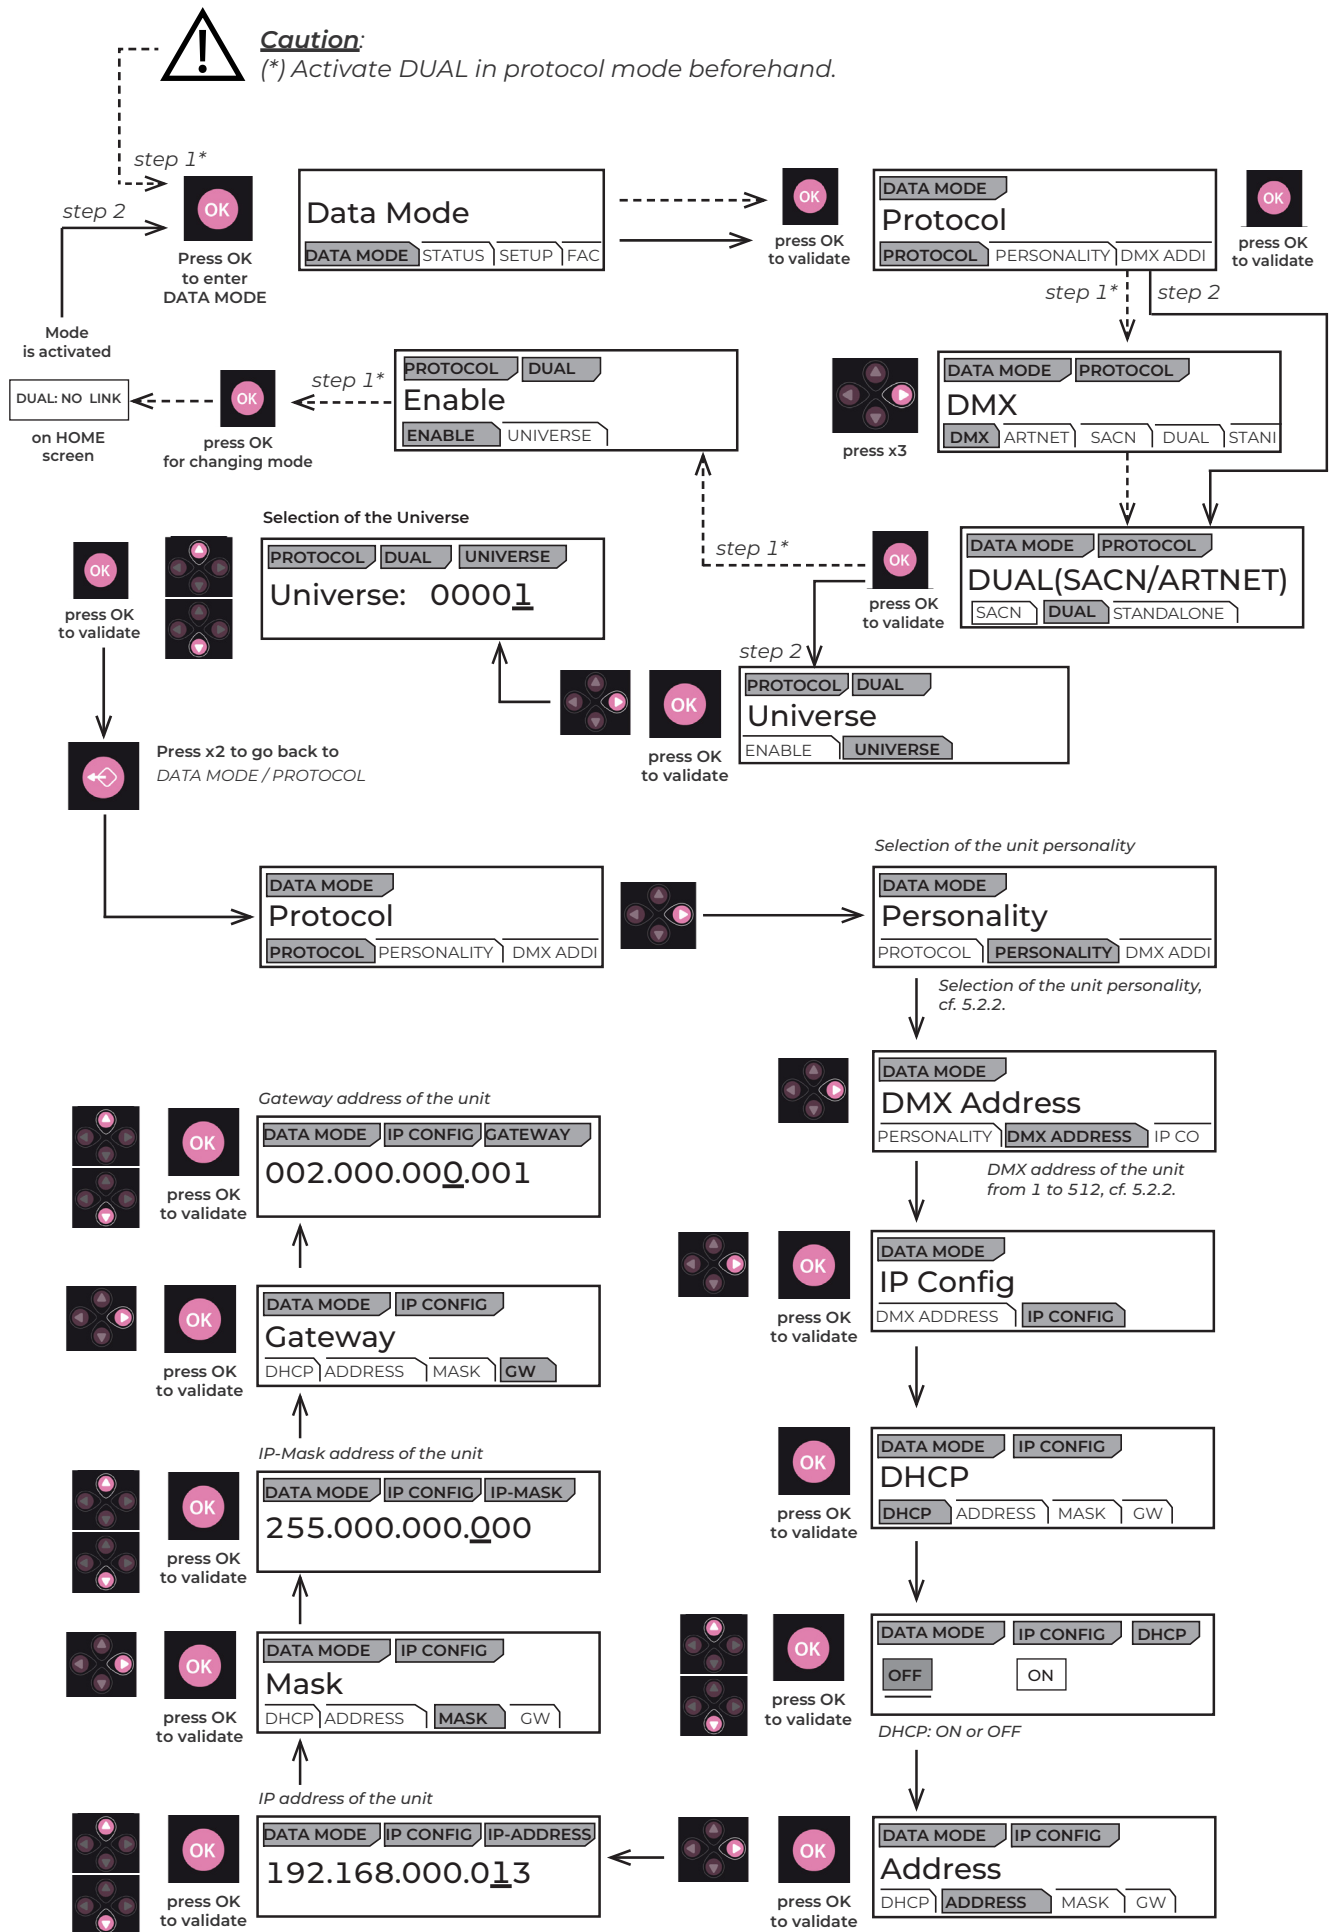

Set mode through Web interface
(see 5.4.4 Web interface)

Set through local control

- 1 - If necessary, change IP settings
- 2 - Set DUAL universe
- 3 - Set DMX address
- 4 - Set personality mode (see 5.2.4. DMX chart)

5.4.4 Web interface

5.4.4.1 Control

The fixture must be connected to a compatible network or directly linked to a computer with an RJ45 Ethernet cable.

The fixture's IP address: **see section 5.4. Network**

5.4.4.2 Connection to the Web interface

- 1 - Open a web browser (Microsoft Edge, Firefox, Apple Safari...)
- 2 - Enter the fixture's IP address in the browser's address bar
 - “00X” is read as “X”.
 - Never type a zero (0) before the numbers XX or X (**see 5.4**)
- 3 - The HOME page will appear, and all settings can now be viewed and modified.

HOME Page

DATA MODE Page

SETUP Page

EXPERT Page, password-protected (1280).

NODE Page

UID* list of devices detected by RDM on the DMX OUT link;
the first UID is the fixture.

(*) UID : RDM Unique Identifier

LLRP is a multicast protocol that facilitates basic IP configuration. It is part of the ESTA E1.33 RDMnet standard.

LLRP can be used for the initial configuration of networked equipment. It provides a low-level mechanism for discovering and configuring the network parameters of devices, including IP settings and basic RDMnet configuration settings.

LLRP Targets expose these parameters for configuration and respond to discovery requests from LLRP Managers. Once an LLRP Manager discovers one or more LLRP Targets, it can use LLRP to send RDM commands to retrieve or modify these parameters.

A SOLUTION FOR INCORRECT OR UNKNOWN IP CONFIGURATION

Network connectivity issues are often caused by misconfigured network addresses, with improperly configured subnet masks being the most common problem.

LLRP uses two multicast IP addresses, enabling communication even when all other network communication has failed.

Since multicast addresses are unaffected by a misconfigured subnet mask, LLRP provides an efficient and reliable solution to recover from network misconfiguration.

In summary, LLRP simplifies the process of identifying and configuring the IP addressing of LLRP-compatible devices on your network.

All Robert Juliat equipment based on the RJ LED2 platform includes LLRP functionality.

Two LLRP Manager software tools are available for free:

- DMXworkshop by Wayne Howell from Singularity (UK): <https://singularity-uk.com/product/dmx-workshop/>

- CLU/Netron from Obsidian : <https://obsidiancontrol.com/netron-clu>

CLU									
NETRON

5.5 Fan cooling modes

5.5.1 Range

Mode	Fan Speed
SILENT	Minimum – constant speed
NORMAL	Regulated – depending on ambient temperature
FULL	Maximum – constant speed

5.5.2 Control

Remotely by DMX512-A
Mode 3 – 4

Locally → selection in
SETUP / COOLING

6.1 Preventive maintenance

6.1.1 Frequency

General maintenance should be performed at least once a year or more frequently if the equipment is operated in adverse conditions (smoke, heat, humidity, touring, etc.).

6.1.2 General cleaning

Remove dust from the unit.

6.1.3 General visual check

- No trace of heat.
- No loose contacts.
- No missing parts.
- Tighten mechanical assemblies (screws, bolts and nuts, etc.).

6.1.4 LED source

- Do not touch the surface of the LED source (no contact with your hands or any tools).
- Do not put compressed air directly on the source.
- Contact a certified RJ distributor in case of residuals or other objects located on the surface of the LED source.

6.1.5 Optics

- Only use solutions containing alcohol to clean optical parts (lenses).
- To clean the optical parts, use a soft cloth in combination with distilled water or isopropyl alcohol recommended for coated optics. Do not use any cleaning product that contains solvents or abrasives, as these can cause surface damage.
- Dry with a soft lint-free cloth.

Inner parts:

- To clean the optical parts, use a soft cloth in combination with distilled water or isopropyl alcohol recommended for coated optics. Do not use any cleaning product that contains solvents or abrasives, as these can cause surface damage.
- Dry with a soft lint-free cloth.

How to remove the Bizet lamp house for cleaning:

We recommend you place your luminaire on a flat clean surface.

Disconnect from the mains before servicing.

- Dismantle the 2 lamp house covers (A) by removing the 28 screws in the recommended order (B) using a torx screwdriver with a TX20 bit.
- Reassemble the covers (A) by fixing the screws back into place in reverse order (B), once servicing has been completed.

- To access to the double condenser optics holder for cleaning:
Dismantle the top lamp house cover (A) by removing the 16 screws B #1 & #2 + B #7 to #10 using a torx screwdriver with a TX20 bit. Then remove the plate (C).

In case of problem, contact RJ distributor with the following information:

- Model, version and serial number of the product.
- From the menu status:
 - Software version
 - LED board IDs
 - Device hours
- Description of the problem.

6.3 Electronic thermal management system

In case of overheating, light intensity will be reduced by the system.

“Power reduction X%” will be shown on the display with the reducing percentage.

6.4 Firmware update

1. Download the firmware from one of the following links :

- www.robertjuliat.com/LED/PDF_PAGE or scan the QR code:
- www.robertjuliat.com/singlelenslum/BIZET_370

2. Unzip the file. There are 4 files:

- Firmware (.upd2 format)
- Firmware history
- Update procedure
- User manual from firmware version V5.0x onwards

3. Switch on the lighting fixture.

4. Connect the fixture to the network using an RJ45 Ethernet cable from your computer.

You can either connect it to your lighting network (RJ45) or directly to your computer (RJ45).

5. Open a Web browser (Microsoft Edge, Firefox, Apple Safari, etc.).

6. Enter the fixture's IP address in the browser's address bar

- “00X” is read as “X”.

- Never type a zero (0) before the numbers XX or X (see section 5.4).

7. Upload your firmware file (.upd2).

In the “Update firmware” window, select the update file and then click on “Submit firmware”.

6.5 Factory defaults

Set to factory defaults /
reset through web interface
(Home page)

Set to factory defaults /
reset through RDM protocol

Set to factory defaults /
reset through local control

Select **FACTORY DEFAULT**
in the main menu to reset
all values and parameters

6.6 Selftest

Select **SELFTEST** in the STATUS menu :

Press OK
to start
SELFTEST

At the end of each test, a **PASS/FAIL** message will be displayed.

If the DMX and network functions need to be tested, the system will prompt you to perform certain operations.

test report: Fail				P=Pass F=Fail			
fans	P	pow	P	temp	P	dmxi	P
dmxo	F	net	F	drv	P		

Test Report

An "F" (FAIL) or "P" (PASS) will be displayed at the end of the self-test (SELFTEST).

If the problem persists, please take a photo of the test result and send it either to your Robert Juliat dealer or to the Robert Juliat After-Sales Service, if requested (email: service@robertjuliat.fr)
